EXPERIENCE

Synchrony Financial — *Software Engineer*

MARCH 2024 - PRESENT

- Created React components to meet new business requirements and to support existing features across the company
- Enhanced UI pipelines to support multiple regions, enabling faster disaster recovery and reducing deployment overhead
- Tested accessibility with Cypress Axe and resolved findings, added to pipelines for continuous monitoring
- Contributed to improvement of unit test coverage to reach 80%

Ally Financial — *Software Engineer*

MAY 2021 - FEBRUARY 2024

- Developed UI components using React for Ally Lending platform
- Helped implement and support flows for user roles to enable origination and management of loans
- Increased automated test coverage in order to reduce manual regression testing and maximize available development time
- Integrated Okta for authentication and single sign-on (SSO) to enhance security and user experience

Centene — *Application Software Developer*

JANUARY 2020 - APRIL 2021

- Continued work on TruCare NextGen healthcare platform
- Developed components for healthcare authorization UI
- Created API endpoints to implement authorization rules
- Wrote unit tests using Jest and end-to-end tests with Cypress

LaunchCode — *Application Software Developer at Centene*

SEPTEMBER 2019 - JANUARY 2020

- Wrote, tested, and deployed Angular and Go code for front end and APIs supporting TruCare NextGen healthcare platform
- Configured metrics to monitor the status of APIs

EDUCATION

Ph.D. Human Factors
North Carolina State University
Raleigh, NC

M.A. Clinical Psychology
University of Texas Permian Basin
Odessa, TX

B.A. Psychology
University of Texas at Dallas
Richardson, TX

SKILLS

HTML, CSS, JavaScript, TypeScript

React, Redux, React Query, Next

React Testing Library, Jest

Angular

Cypress

Storybook

Node.js, Express

Go

CI/CD pipeline development and automation

Docker
